

EKH Stage Dimensions

Width: 9,87m, but real 6m (There is a frame that let's the audience only see 6m. Most of the time we put at least on the right side of the stage a curtain to have an offstage and entrance to the stage)

Hight to the Traverse/Aerial-Rigging-Point: 5,55m, visible to 4,3m
(Because of the frame and lights/spots you can only see without a problem to around 4,3m)

Depth: 3,9m minus 0,4m for the curtain in the back.
